

## ACS / Reagent Chemicals and Semiconductor Process Chemicals

### Chemicals and Chemical Blends

Puritan Products, an ISO-9001 certified chemical manufacturer, currently supplies high quality specialty chemicals and chemical blends in various batch sizes and concentrations to laboratories, industry and semiconductor companies. If you can't find the product you are looking for, let our technical resources help you get the product, solution or blend that you need. Call or go to our website at [www.puritanproducts.com](http://www.puritanproducts.com).

Quality • Consistency • Confidence

## ACS / Reagent Chemicals

All of our ACS and/or Reagent grade chemicals are available in a variety of concentrations and purity levels to meet your needs. Specifications can be customized for tighter assay ranges or the inclusion of additional specifications as needed for your application.

- Acetic Acid
- Acetone
- Ammonium Chloride solutions
- Ammonium Hydroxide
- Butyl Alcohol
- Calcium Nitrate
- Cyclohexane
- Decanoic Acid
- Deionized Water
- Ethanol
- Ethyl Acetate
- Ethylene Dichloride
- Formaldehyde
- Formic Acid
- Glycerin
- Heptane
- Hexane
- Hydrochloric Acid
- Hydrofluoric Acid
- Hydrogen Peroxide
- Isopropyl Alcohol
- Methanol
- Methyl Ethyl Ketone
- Monoethanolamine
- Nitric Acid
- Nitric Acid, Fuming
- N-Methyl-2-Pyrrolidinone
- N-Propyl Alcohol
- Peracetic Acid
- Perchloric Acid
- Petroleum Ether
- Phosphoric Acid
- Potassium Carbonate solutions
- Potassium Hydroxide solutions
- Potassium Permanganate
- Potassium Phosphate solutions
- Sodium Acetate solutions
- Sodium Bicarbonate solutions
- Sodium Bisulfate solutions
- Sodium Carbonate solutions
- Sodium Chloride solutions
- Sodium Hydroxide solutions
- Sodium Iodide
- Sodium Thiosulfate solutions
- Sulfuric Acid
- Sulfuric Acid, Fuming
- Toluene
- Trichloroethylene
- Water
- Xylene

## Semiconductor Process Chemicals

Our semiconductor process chemicals will meet or exceed SEMI specifications. In fact, many of the products listed will meet or exceed 100 ppb trace impurity levels. All products are available in a wide range of concentrations as well as blended with other chemicals to meet your specific application needs.

- Acetic Acid
- Acetone
- Ammonium Fluoride, 40%
- Ammonium Hydroxide
- Aqua Regia
- Buffered Chemical Polish
- Buffered Citric Acid
- Buffered Oxide Etchants (BOE)
- Hydrochloric Acid
- Hydrofluoric Acid
- Hydrogen Peroxide
- Isopropyl Alcohol
- Methanol
- Methylene Chloride (Dichloromethane)
- Methyl Ethyl Ketone
- N-Methyl-2-Pyrrolidone
- Mixed Acid Etchants (MAE)
- Nitric Acid
- Phosphoric Acid Etchants
- Potassium Hydroxide, 45%
- 2-Propanol
- Sodium Hydroxide, 50%
- Sulfuric Acid
- Xylenes
